What is This Website?

A plain-English summary for first-time readers

Career Launcher Ahmedabad is a complete online home for a well-known coaching institute that helps students prepare for competitive entrance exams — including CAT (MBA), CLAT (Law), IPMAT (BBA), GMAT, CUET, and school Mathematics. The website lets prospective students discover courses, book free demo classes, earn scholarship discounts by taking a short test, and pay fees securely online. Enrolled students get a personal dashboard where they can track their courses, attempt practice tests, and download study materials. A powerful Admin Control Room lets the institute team manage everything — students, payments, blog posts, announcements — without needing any technical help.

↓

[COMPLETE!] Student is now fully enrolled. Their Dashboard shows the course as active.

↓

Section 6: Data Flow (Simplified)

What information do you give, and where does it go?

WHEN YOU REGISTER OR BOOK A DEMO

You type: Your name, email, phone number, and exam choice

↓

The website: Secures your password using strong encryption (unreadable to anyone)

↓

Your details go into: A secure digital record (like a personal locker) with your unique ID

↓

Automatically: A welcome email is sent to your inbox confirming the account

↓

From then on: Whenever you log in, the website recognizes your locker and opens it for you, showing your personal dashboard

WHEN YOU TAKE THE SCHOLARSHIP TEST

You answer: 20 multiple-choice questions in 21 minutes

↓

The website counts: How many answers were correct and calculates your percentage

↓

A scholarship band is assigned: Gold (50% off), Silver (35% off), Merit (25% off), Achiever (15% off), or Participation (10% off)

↓

Saved permanently: Your scholarship percentage is stored in your account and applied automatically to course fees

↓

You can download: A personalized PDF certificate with your name, band, and scholarship percentage

WHEN YOU MAKE AN ONLINE PAYMENT

You enter: Your card or UPI details on the Razorpay secure payment screen

↓

Razorpay handles: All card and payment data — the website never sees your card number

↓

Payment confirmed: Razorpay sends a secret digital stamp that the website verifies automatically

↓

Access unlocked: Your test series or course enrollment is activated immediately on confirmation

↓

Recorded: A payment record is stored in the admin's panel for reconciliation

Your Password	Encrypted using industry-standard bcrypt (12 rounds) — unreadable even by the admin team
Your Email Address	Used for login identification, welcome emails, scholarship result emails, and demo confirmations
Your Phone Number	Used for WhatsApp follow-up by the admin team — never shared publicly
Scholarship Percentage	Permanently stored on your account and applied as a discount on any course enrollment
Test Answers & Score	Stored for your personal history and used to calculate percentile among all students who attempted
Exam Session Token	A one-time security code that links your test submission to your account — prevents any tampering

Section 7: What Happens When Something Goes Wrong?

Error handling explained in plain English

DIAGRAM LEGEND			
● **Blue Box** A step the user takes (an action)	● **Green Box** A successful outcome or completion	● **Amber Box** A decision point or warning	● **Red Box** An error or failure state
● **Purple Box** An admin-only action or area	▯ **Teal Box** A system response or information	↓ **Arrow** Flow direction (what happens next)	

COMMON ERROR SITUATIONS AND HOW THEY ARE HANDLED

Wrong Password at Login	A clear, friendly message appears: 'Invalid email or password.' You can try again immediately. After 10 failed attempts in an hour, you will need to wait before trying again (security protection).
Email Already Registered	When registering, if your email is already in the system, you see a message: 'An account with this email already exists. Please login.' You are guided to the Login page.
Deactivated Account	If the institute has deactivated your account, you see: 'Your account has been deactivated. Please contact us.' You are not locked out permanently — contact the institute to resolve this.
Exam Session Expired	If you try to submit the scholarship test after the session has expired, you see a friendly warning and are redirected to try again. No data is lost.
3 Exam Violations (Anti-Cheat)	After 3 detected violations (tab switch / copy attempt / fullscreen exit), the exam auto-submits with whatever answers you have provided so far. Your score is calculated from those answers.
Payment Failed	If the Razorpay payment fails or is cancelled, the system records a 'failed' payment status. You are not charged. You can try again by clicking 'Buy Now' again on the test series page.
Download Link Expired	Secure download links for gated resources expire after 15 minutes. If you try to use an old link, you see a '403 Access Expired' message. Simply request a new link by entering your email again.
Page Not Found (404)	If you type a wrong URL or click a broken link, you see a friendly 404 page with options to go back to the homepage or contact support.
Internal Server Error (500)	On very rare occasions the website might show a '500' error. This means something unexpected happened on the system side. Refreshing usually fixes it. If it persists, contact the institute.
Contact Form Abuse Protection	The contact form has a limit of 10 submissions per minute. If too many are sent, further submissions are temporarily blocked to protect the system.

REASSURANCE FOR NON-TECHNICAL READERS

Every error on this website is designed to be recoverable. No error permanently blocks a student. All error pages include clear guidance on what to do next. When in doubt, contact the institute via WhatsApp (+91 99785 59986) or email cl_ahmedabad@careerlauncher.com — a team member will help you within the day.
